GlobalSecurity.org is the leading source of background information and developing news stories in the fields of defense, space, intelligence, US Department of Energy, WMD, and homeland security.

EDTA is the preeminent US industry association dedicated to the promotion of electric drive as the best means to achieve the nimble, clean, attractive, and efficient and clean use of electricity in the transportation sector. EDTA is the voice of all US companies that is engaged in the development, production, use, and promotion of electric drive. EDTA represents the complete supply chain, including original equipment manufacturers, component manufacturers, service providers, and associated organizations. EDTA is a membership-based trade association that works to increase the visibility of electric drive and promote its benefits in the transportation sector.

Quantum4D, Inc. was founded to develop the next generation visual interface to analyze and discover information and data. Today, Quantum4D introduces an entirely new framework to communicate the nature of information and the way we perceive the world. By creating an interactive and dynamic environment, the Quantum4D platform enables users to fly through and interact with the vast amounts of data, images, and information that are available today. This platform allows users to create lenses and visualizations that help them to analyze and understand complex datasets in a way that is intuitive and engaging. Quantum4D is committed to democratizing access to the best data on religion.

RealClearPolitics (RCP) has become one of America's premier independent political news sites. Updated every morning and throughout the day, RCP pulls together the best commentary, news, polling, and analysis from all points of the political compass and covers all the important issues of the day. RealClearPolitics has become a trusted filter for anyone interested in politics.

This project examines changes in the language of the State of the Union address over the past 200 years.

TechPresident's coverage is expanding to cover everything from how President Obama is using the web, to how campaigns at all levels are going online, to how voters are responding and creating their own user-generated content.

Baseball statistics and history

A blog on ideas

A practical blog for impractical people.

Management consulting, leadership training, development, and project management

STAT-USA/Internet, a service of the U.S. Department of Commerce, is a single point of access to authoritative business, trade, and economic information from across the Federal Government.

Worldmapper is a collection of world maps, where territories are re-sized on each map according to the subject of interest. There are now nearly 700 maps.

A quarterly economic forecast for the U.S. & California

The Council for Community and Economic Research is a membership organization created in 1961 to promote excellence in community and economic research by working to improve data economy and its relationship with Federal Government spending and economic analytic methods. We accomplish our mission through professional networks, training, advocacy, research, and delivering products and services.

PerotCharts.com was designed to provide information about the economy and its relationship with Federal Government spending and borrowing.

A Blog About Maps and the World

Access to a broad range of public databases, including OECD Factbook, Eurostat, World Bank, US Census Bureau, among others.

The GTD Data Rivers is an interactive visual exploratory tool that allows users to investigate temporal trends in terrorism in the Global Terrorism Database (GTD). The GTD Data Rivers annotates the GTD's time series of terrorist events by state and world region with a wave of information such as headlines, summaries, and images. This information is gathered directly from the Bay Area News Group, the BBC, and other sources. Data is also gathered from the FBI's Laboratory and the Department of Justice. Our goal in releasing this site is to (1) improve access to data, (2) help our community create innovative apps, (3) work with the API easier, a Python client library is available.

1. Improve access to data developers, through a RESTful API and regular data dumps. To make working with the API easier, a Python client library is available.
2. Help our community create innovative apps.
3. Understand what datasets you’d like to see.
